

# **STIC Search Report**

## **Biotech-Chem Library**

**STIC Database Tracking Number: 105844**

**TO: Malgorzata Walicka**  
**Location: cm1/10d06/10d01**  
**Art Unit: 1652**  
**Wednesday, October 15, 2003**

**Case Serial Number: 10/054295**

**From: Edward Hart**  
**Location: Biotech-Chem Library**  
**CM1-6B02**  
**Phone: 305-9203**

**edward.hart@uspto.gov**

### **Search Notes**

Examiner Walicka,

Here are the results of the search you requested.

Please feel free to contact me if you have any questions.

Edward Hart

# STIC SEARCH RESULTS

## Biotech-Chem Library

Questions about the scope or the results of the search? Contact *the searcher or contact*:

Mary Hale, Information Branch Supervisor  
308-4258, CM1-1E01

## Voluntary Results Feedback Form

➤ I am an examiner in Workgroup:  Example: 1610

➤ Relevant prior art **found**, search results used as follows:

- ☐ 102 rejection
- ☐ 103 rejection
- ☐ Cited as being of interest.
- ☐ Helped examiner better understand the invention.
- ☐ Helped examiner better understand the state of the art in their technology.

Types of relevant prior art found:

- ☐ Foreign Patent(s)
- ☐ Non-Patent Literature  
(journal articles, conference proceedings, new product announcements etc.)

➤ Relevant prior art **not found**:

- ☐ Results verified the lack of relevant prior art (helped determine patentability).
- ☐ Results were not useful in determining patentability or understanding the invention.

Comments:

Drop off or send completed forms to STIC/Biotech-Chem Library CM1 - Circ. Desk

## INFORMATION FOR SEQ ID NO: 4:

SEQUENCE CHARACTERISTICS:  
LENGTH: 3855 base pairs  
TYPE: nucleic acid  
STRANDEDNESS: single  
TOPOLOGY: linear  
MOLECULE TYPE: cDNA  
FEATURE:

NAME/KEY: -  
LOCATION: 1..3855  
OTHER INFORMATION: /note= "nucleic acid sequence with an open reading frame encoding a delta-182 variant polypeptide"

## FEATURE:

NAME/KEY: CDS  
LOCATION: 56..2479  
OTHER INFORMATION: /product= "delta-182 variant polypeptide"

SEQUENCE DESCRIPTION: SEQ ID NO: 4:

pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

PCT-US99-06898-1

; Sequence 1, Application PC/TUS9906898

; GENERAL INFORMATION:

; APPLICANT: Gaeta, Federico C.A.

; APPLICANT: Geron Corporation

; TITLE OF INVENTION: Methods and Compositions for Eliciting an Immune

; TITLE OF INVENTION: Response to a Telomerase Antigen

; FILE REFERENCE: 015389-003500PC

; CURRENT APPLICATION NUMBER: PCT/US99/06898

; CURRENT FILING DATE: 1999-03-30

; EARLIER APPLICATION NUMBER: US 08/911,312

; EARLIER FILING DATE: 1997-08-14

; EARLIER APPLICATION NUMBER: US 08/912,951

; EARLIER FILING DATE: 1997-08-14

; EARLIER APPLICATION NUMBER: US 08/915,503

; EARLIER FILING DATE: 1997-08-14

; EARLIER APPLICATION NUMBER: WO PCT/US97/17618

EARLIER FILING DATE: 1997-10-01  
EARLIER APPLICATION NUMBER: WO PCT/US/17885  
EARLIER FILING DATE: 1997-10-01  
EARLIER APPLICATION NUMBER: US 08/974,549  
EARLIER FILING DATE: 1997-11-19  
EARLIER APPLICATION NUMBER: US 08/974,584  
EARLIER FILING DATE: 1997-11-19  
NUMBER OF SEQ ID NOS: 2  
SOFTWARE: PatentIn Ver. 2.0  
SEQ ID NO 1  
LENGTH: 4015  
TYPE: DNA  
ORGANISM: Homo sapiens  
FEATURE:  
NAME/KEY: CDS  
LOCATION: (56)...(3454)  
OTHER INFORMATION: human telomerase reverse transcriptase (hTERT)  
PCT-US99-06898-1

## RESULT 13

US-09-052-864-1

; Sequence 1, Application US/09052864

; GENERAL INFORMATION:

; APPLICANT: Morin, Gregg B.

; TITLE OF INVENTION: Human Telomerase Catalytic Subunit

; TITLE OF INVENTION: Variants

; NUMBER OF SEQUENCES: 18

; CORRESPONDENCE ADDRESS:

; ADDRESSEE: Townsend and Townsend and Crew LLP

; STREET: Two Embarcadero Center, Eighth Floor

; CITY: San Francisco

; STATE: California

; COUNTRY: USA

; ZIP: 94111-3834

; COMPUTER READABLE FORM:

; MEDIUM TYPE: Floppy disk

; COMPUTER: IBM PC compatible

; OPERATING SYSTEM: PC-DOS/MS-DOS

; SOFTWARE: PatentIn Release #1.0, Version #1.30

; CURRENT APPLICATION DATA:

; APPLICATION NUMBER: US/09/052,864

; FILING DATE: 31-MAR-1997

; CLASSIFICATION: 435

; PRIOR APPLICATION DATA:

; APPLICATION NUMBER: US 08/851,843

; FILING DATE: 06-MAY-1997

; PRIOR APPLICATION DATA:

; APPLICATION NUMBER: US 08/854,050

; FILING DATE: 09-MAY-1997

; PRIOR APPLICATION DATA:

; APPLICATION NUMBER: US 08/911,312

; FILING DATE: 14-AUG-1997

; PRIOR APPLICATION DATA:

; APPLICATION NUMBER: US 08/912,951

; FILING DATE: 14-AUG-1997

; PRIOR APPLICATION DATA:

; APPLICATION NUMBER: US 08/915,503

prepared and sequenced in Mouse Genome Encyclopedia  
Project of Genome Exploration Research Group in Riken  
Genomic Sciences Center and Genome Science Laboratory in  
RIKEN, Division of Experimental Animal Research in Riken  
contributed to prepare mouse tissues. 1st strand cDNA was  
primed with a primer [5'  
GAGAGAGAGAAGGATCCAGAGCTCTTTTTTTTTTTTTTTT 3'], cDNA was

prepared by using trehalose thermo-activated reverse transcriptase and subsequently enriched for full-length by cap-trapper. cDNA went through one round of normalization to Rot = 5.0 and subtraction to Rot = 25.0. Second strand cDNA was prepared with the primer adapter of sequence [5' GAGAGAGAGATCTCGAGTAAATTAATATCCGCCGCCGCC 3']".

Pred. No. is the number of results predicted by chance to have a

score greater than or equal to the score of the result being printed,  
and is derived by analysis of the total score distribution.

SUMMARIES

PT Eliciting an in vivo immune response for prevention and treatment of  
PT cancers -  
XX  
PS Disclosure; Fig 2; 26pp; English.  
XX  
CC The present sequence encodes a human telomerase reverse transcriptase  
CC (TTR) polypeptide. The protein is used in the method of the invention.  
CC The specification describes a method for activating a T lymphocyte,  
CC comprising contacting the T lymphocyte with a dendritic cell that  
CC expresses a TTR peptide in the context of a MHC class I or MHC class  
CC II molecule. The protein causes induction of an in vivo immunological  
CC response to telomerase activity. Cancer cells are characterized by  
CC expression of endogenous TTR gene and the presence of detectable  
CC telomerase activity. Therefore, by eliciting a specific immune response  
CC to TTR or to TTR-expressing cells, it is possible to selectively target  
CC proliferating cells for immunological destruction. The method is used  
CC for eliciting an in vivo immune response to telomerase by activating  
CC a T lymphocyte, and is useful for prevention and treatment of cancers and  
CC other proliferation diseases/conditions.

PT New catalytic polypeptide and polynucleotide, useful for increasing  
PT catalytic activity in a cell  
XX  
XX Disclosure; Fig 2; 24pp; English.  
XX  
XX This is the nucleotide sequence of cDNA encoding human telomerase  
XX reverse transcriptase (hTERT, see AAY32090). Human telomerase is a  
XX target for diagnosing and treating diseases relating to cell  
XX proliferation and senescence, such as cancer, or for increasing  
XX the proliferative capacity of a cell. A claimed method for  
XX increasing the proliferative capacity of a vertebrate cell,  
XX especially a human or other mammalian cell, involves introducing  
XX into the cell a recombinant hTERT polynucleotide encoding an hTERT  
XX variant in which residues 192-323, 200-323, 192-271, 200-271,  
XX 222-240, 415-450, 192-323 and 415-450, or 192-271 and 415-450 are  
XX deleted. A claimed method for reducing telomerase activity in a  
XX cell involves introducing a recombinant polynucleotide encoding  
XX an hTERT variant having a deletion of amino acids 192-450, 560-565,  
XX 637-660, 638-660, 748-764 or 1055-1071. The polynucleotides are  
XX obtained by mutagenesis of the hTERT coding sequence.

Quantifying tumor cells by amplifying mRNA encoding the catalytic subunit of telomerase  
Example; Fig 1A-B; 26pp; German.  
This invention describes a novel method for the quantitation of tumour cells in a body fluid which comprises (1) enrichment or isolation of tumour cells in the sample, (2) amplification of mRNA from these cells that encodes the catalytic subunit of telomerase and (3) quantifying the amount of amplified mRNA. The method is applied to tumour cells derived from (micro)metastases, e.g. associated with a wide range of tumours such as T-cell lymphoblastoma, chronic myeloid or acute lymphatic leukemia, melanoma, pulmonary carcinoma, cancer of colon or breast etc. This sequence encodes a human telomerase protein catalytic domain.

Composition for treating wounds and enhancing epithelization of a skin
surface, comprises vector encoding telomerase reverse transcriptase or
telomerized epithelial cells on a microparticle or a matrix -
PS Disclosure; Page 31-32; 68pp; English.
XX
The present invention describes a pharmaceutical composition (I)
comprising a vector encoding telomerase reverse transcriptase (TERT) in
an excipient or device, or comprises telomerized epithelial cells on a
microparticle or a matrix suitable for topical administration or
administration to a wound site. (I) has vulnary and antitumor
activities and can be used to promote epithelial cell migration. (I) is
useful for treating a wound and enhancing epithelialisation of a skin
surface. The wound is especially skin wound including acute lesion such
as traumatic lesion, burn, or surgical incision, chronic lesion such as
chronic venous ulcer, diabetic ulcer or compression ulcer and the wound
is further monitored for closure. The telomerase activity or TERT
```

expression is increased in epithelial cells at the site of treatment and also in fibroblasts or endothelial cells at the site of treatment. The epithelial cells are especially keratinocytes. A polynucleotide encoding TERT is useful for the preparation of a medicament for treatment of a wound on an epithelial surface in a human or animal. An epithelial cell with increased telomerase activity or increased expression of TERT is useful for preparation of a medicament for the treatment of a wound in a human or animal. (1) is also useful for treating wounds of other epidermal surfaces including mucosal surfaces such as bronchus, mouth, nose, oesophagus, stomach, or intestine. The present sequence encodes human TERT (hTERT), which is given in the exemplification of the present invention. hTERT is located to chromosome 5.

XX Antisense polynucleotides for human telomerase reverse transcriptase  
PT used for diagnosing or treating cancer -  
XX Claim 1; Fig 1; 31pp; English.  
XX The present sequence encodes for human telomerase reverse transcriptase  
CC (hTERT). This is the catalytic protein component of telomerase and is also  
CC referred to as hEST2. This correlates with cell proliferative capacity,  
CC cell immortality, and the development of a neoplastic phenotype. Human  
CC TTT antisense oligonucleotides are useful for diagnostic or prognostic  
CC applications to telomerase related conditions, including cancer. They are  
CC also useful as therapeutic agents, for inhibition of telomerase  
CC expression and activity.

PT	New isolated human telomerase catalytic sub-unit gene - used to		
PT	develop products for increasing or reducing the life span of cells		
PT	such as cancer cells or transformed cells		
XX			
PS	Claim 5; Fig 5A-B; 96pp; English.		
XX			
CC	The present sequence encodes the catalytic subunit of a human		
CC	telomerase holoenzyme. Disruption of the telomerase gene alters		
CC	telomere maintenance. The DNA is essential for telomerase activity,		
CC	and the protein is physically associated with telomerase and a		
CC	constituent of active telomerase complex. The products can be used		
CC	for increasing or reducing the lifespan of cells such as cancer cells		
CC	or transformed cells. They can also be used in the diagnosis and		
CC	treatment of malignancies. In addition, cells with a longer lifespan		
CC	can be transplanted into or grafted onto an individual (e.g. as skin		
CC	grafts, as systems for delivery of therapeutic proteins, such as hormones		
CC	and enzymes), to whom they provide therapeutic benefit.

CC progenitor cells in vivo, in vitro or ex vivo protocols. The methods  
CC can be used for promoting the healing of wounds resulting from  
CC e.g. surgery, burns, inflammation or irritation or ulcers resulting from  
CC e.g. venous disease (venous stasis ulcers), excessive pressure (decubitus  
CC ulcers) or arterial ulcers. They can also be used to enhance tissue  
CC regeneration processes, e.g. of the skin, hair and/or fingernails. They  
CC can also be used for treating age-related conditions, e.g. atrophy of the  
CC skin through loss of extracellular matrix homeostasis in dermal  
CC fibroblasts, age-related macular degeneration caused by accumulation of  
CC lipofuscin and downregulation of a neuronal survival factor in retinal  
CC pigmented epithelial (RPE) cells, and atherosclerosis caused by loss of  
CC proliferative capacity and overexpression of hypertensive and thrombotic  
CC factors in endothelial cells. Expanded populations of normal or  
CC genetically engineered rejuvenated cells could be used for autologous or  
CC allogeneic cell and gene therapy. They can also be used for prolonging  
CC the lifespan of a culture of normal cells or tissue being used to secrete  
CC therapeutic or other commercially significant proteins and products.

 XX New method for increasing the proliferative capacity of cell lines  
 XX comprises administering agents reversibly activating telomerase  
 XX activity and reversibly inactivating Rb/INK4 and/or p53 pathways useful  
 XX in treating age related diseases  
 XX Claim 14; Page 112-116; 123pp; English.  
 XX This cDNA, designated hEST2, is a human telomerase catalytic subunit  
 XX homologue of yeast Est2p and Euplotes p123. hEST2 is a member of the  
 XX reverse transcriptase family of enzymes.  
 XX The invention concerns methods and reagents for extending the life-span,  
 XX e.g. the number of mitotic divisions, of a cell. The method relies on  
 XX activation of a telomerase activity and inhibition of one or both of a  
 XX retinoblastoma (Rb)/INK4 pathway or a p53 pathway. Phosphorylation of Rb  
 XX by cyclin-dependent kinases, cdk4 and cdk6, releases the cells into the  
 XX division cycle. Binding of INK4 family members, e.g. the tumour  
 XX suppressor p16INK4a, inhibits kinase activity and results in growth  
 XX arrest. Rb inactivators can selectively and reversibly inactivate an  
 XX Rb/INK4 pathway, especially an Rb/p16INK4a pathway. The oncoprotein MDM2  
 XX is a cellular inhibitor of Rb/E2F function and the p53 tumour suppressor  
 XX and can also be used in the methods. Other molecules which can be used  
 XX include cdk4 or cdk6 mutants. In particular, a cdk4 mutant is one which  
 XX differs from at one or more of residues K22, R24, H95 and/or D97.  
 XX Additional constructs include a papilloma virus E7 protein, or other  
 XX viral oncoprotein which bypasses Rb and/or p53. Antisense constructs of  
 XX the Rb and p16INK4a genes may also be used. The methods are useful for  
 XX increasing the proliferative capacity of cells. The cells are  
 XX subsequently of use in pharmaceutical and cosmetic preparations used to  
 XX treat conditions related to (premature) ageing, e.g. macular degeneration  
 XX and arteriosclerosis. The cells can also be used to replace tumour cell  
 XX lines in vitro and for studies on biochemical and physiological aspects  
 XX of growth and differentiation. Long lived (immortal) cells could also be  
 XX of use in the production of normal or genetically engineered  
 XX biotechnology products.

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

US-09-675-321-1  
; Sequence 1, Application US/09675321  
; Patent No. 6440735  
; GENERAL INFORMATION:  
; APPLICANT: Gaeta, Federico C.A.  
; APPLICANT: Geron Corporation  
; TITLE OF INVENTION: Methods and Compositions for Eliciting an Immune  
; FILE REFERENCE: Response to a Telomerase Antigen  
; CURRENT APPLICATION NUMBER: US/09/675,321  
; CURRENT FILING DATE: 2000-09-28  
; PRIOR APPLICATION NUMBER: US 60/112,006  
; PRIOR FILING DATE: 1998-03-31  
; PRIOR APPLICATION NUMBER: WO PCT/US99/06898  
; NUMBER OF SEQ ID NOS: 2  
; SOFTWARE: PatentIn Ver. 2.0  
; SEQ ID NO 1  
; LENGTH: 4015  
; TYPE: DNA  
; ORGANISM: Homo sapiens  
; FEATURE:  
; NAME/KEY: CDS  
; LOCATION: (56)..(3454)  
; OTHER INFORMATION: human telomerase reverse transcriptase (hTERT)  
US-09-675-321-1

US-08-851-843A-173  
; Sequence 173, Application US/08851843A  
; Patent No. 6093809  
; GENERAL INFORMATION:  
; APPLICANT: Cech, Thomas R.  
; APPLICANT: Lingner, Joachim  
; APPLICANT: Nakamura, Toru  
; APPLICANT: Chapman, Karen B.  
; APPLICANT: Morin, Gregg B.  
; APPLICANT: Harley, Calvin  
; APPLICANT: Andrews, William H.  
; TITLE OF INVENTION: No. 6093809el Telomerase  
; NUMBER OF SEQUENCES: 225  
; CORRESPONDENCE ADDRESS:  
; ADDRESSEE: Townsend and Townsend and Crew LLP  
; STREET: Two Embarcadero Center, 8th Floor  
; CITY: San Francisco  
; STATE: California  
; COUNTRY: United States of America  
; ZIP: 94111  
; COMPUTER READABLE FORM:  
; MEDIUM TYPE: Floppy disk  
; COMPUTER: IBM PC compatible  
; OPERATING SYSTEM: PC-DOS/MS-DOS  
; SOFTWARE: PatentIn Release #1.0, Version #1.30  
; CURRENT APPLICATION DATA:  
; APPLICATION NUMBER: US/08/851.843A  
; FILING DATE: 06-MAY-1997  
; CLASSIFICATION:  
; PRIOR APPLICATION DATA:  
; APPLICATION NUMBER: US 08/846,017  
; FILING DATE: 25-APR-1997  
; CLASSIFICATION:  
; PRIOR APPLICATION DATA:  
; APPLICATION NUMBER: US 08/844,419  
; FILING DATE: 18-APR-1997  
; CLASSIFICATION:  
; PRIOR APPLICATION DATA:  
; APPLICATION NUMBER: US 08/724,643  
; FILING DATE: 01-OCT-1996

## GENERAL INFORMATION:

APPLICANT: Cech, Thomas R.

Lingner, Joachim

Nakamura, Toru

Chapman, Karen B.

Morin, Gregg B.

Harley, Calvin

Andrews, William H.

TITLE OF INVENTION: No. US20020164786A1el Telomerase

NUMBER OF SEQUENCES: 225

CORRESPONDENCE ADDRESS:

ADDRESSEE: Townsend and Townsend and Crew LLP

STREET: Two Embarcadero Center, 8th Floor

CITY: San Francisco

STATE: California

COUNTRY: United States of America

ZIP: 94111

COMPUTER READABLE FORM:

MEDIUM TYPE: Floppy disk

COMPUTER: IBM PC compatible

OPERATING SYSTEM: PC-DOS/MS-DOS

SOFTWARE: PatentIn Release #1.0, Version #1.30

CURRENT APPLICATION DATA:

APPLICATION NUMBER: US/09/843,676  
FILING DATE: 26-Apr-2001  
CLASSIFICATION: 536

## RESULT 12

US-09-412-173  
; Sequence 173, Application US/09843676  
; Patent No. US20020164786A1  
; GENERAL INFORMATION:  
; APPLICANT: Cech, Thomas R.  
; Lingner, Joachim  
; Nakamura, Toru  
; Chapman, Karen B.  
; Morin, Gregg B.  
; Harley, Calvin  
; Andrews, William H.  
; TITLE OF INVENTION: NO. US20020164786A1el Telomerase  
; NUMBER OF SEQUENCES: 225  
; CORRESPONDENCE ADDRESS:  
; ADDRESSEE: Townsend and Townsend and Crew LLP  
; STREET: Two Embarcadero Center, 8th Floor  
; CITY: San Francisco  
; STATE: California  
; COUNTRY: United States of America  
; ZIP: 94111  
; COMPUTER READABLE FORM:  
; MEDIUM TYPE: Floppy disk  
; COMPUTER: IBM PC compatible  
; OPERATING SYSTEM: PC-DOS/MS-DOS  
; SOFTWARE: Patent in Release #1.0, Version #1.30  
; CURRENT APPLICATION DATA:  
; APPLICATION NUMBER: US/09/843,676  
; FILING DATE: 26-Apr-2001  
; CLASSIFICATION: 536  
; PRIOR APPLICATION DATA:  
; APPLICATION NUMBER: US/08/954,050  
; FILING DATE: 09-MAY-1997  
; APPLICATION NUMBER: US 08/846,017  
; FILING DATE: 25-APR-1997  
; APPLICATION NUMBER: US 08/844,419

```

;
; FILING DATE: 18-APR-1997
; APPLICATION NUMBER: US 08/724,643
; FILING DATE: 01-OCT-1996
; ATTORNEY/AGENT INFORMATION:
; NAME: Apple, Randolph T.
; REGISTRATION NUMBER: 36,429
; REFERENCE/DOCKET NUMBER: 015389-002930US
; TELECOMMUNICATION INFORMATION:
; TELEPHONE: (415) 576-0200
; TELEFAX: (415) 576-0300
; INFORMATION FOR SEQ ID NO: 173:
;     SEQUENCE CHARACTERISTICS:
;       LENGTH: 4029 base pairs
;       TYPE: nucleic acid
;       STRANDEDNESS: single
;       TOPOLOGY: linear
;     MOLECULE TYPE: cDNA
;     FEATURE:
;       NAME/KEY:
;         LOCATION: 1..4029
;         OTHER INFORMATION: /note= "preliminary sequence for
;         human TR1 cDNA insert of
;         plasmid pGRN121"
;     SEQUENCE DESCRIPTION: SEQ ID NO: 173:
; US-09-843-676-173
;
; Query Match          95.98;   Score 3849.2;   DB 10;   Length 4029;
